Name of the Scheme: IIFL Capital Enhancer Fund – Series 1

Type of the Scheme: An Annual Interval Scheme investing in Equity and Equity Related Securities

Investment Objective:

To achieve long term capital appreciation by investing in equity and equity related securities, with strategy of hedging the portfolio with Nifty 50 Put Option and other Equity derivatives. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

Asset Allocation Pattern of the Scheme:

The investment policies of the Scheme shall be as per SEBI (Mutual Funds) Regulations, 1996, and within the following guidelines. Under normal market circumstances, the investment range would be as follows:

Instruments	Indicative Allocation (% of Net assets)	Risk Profile
Equity and Equity related instruments	65% - 100%	High
Debt and money market instruments in India rated AAA or its equivalent	0% -35%	Low to Medium

Equity related instruments are securities which give the holder of the security right to receive equity shares and includes share warrants, convertible preference shares and compulsorily or optionally convertible debentures.

As a strategy, the Scheme shall hedge its long position by buying a NIFTY 50 PUT Option of contract value up to 110% of its net assets (the option premium paid not exceeding 8% of the net assets), subject to the guidelines issued by SEBI from time to time and in line with the investment objective of the Scheme.

The total exposure related to option premium paid shall not exceed 8% of the net assets of the Plan. Moreover, this upper limit of 8%, for investments in options premium, if any, shall be applicable only at the time of investment. If due to market actions the value of options appreciates/ depreciates resulting in breach of the limit of 8%, the fund manager may or may not rebalance the portfolio and may run with the ongoing exposure. Further, the fund manager shall purchase put option every year, for investors who continue to stay invested. The 8% premium limit shall be applicable per year and not on a cumulative/since inception basis. However, if the fund manager sells the option before expiry of the contract, the reinvestment, if any, would be subject to the maximum 8% limit on options premium.

Investment Strategy during Specified Transaction Period:

The scheme shall use index and stock derivatives (Futures and Options) to hedge partially or completely the equity portfolio. The Plan shall not (i) undertake repo/reverse repo transactions in Corporate Debt Securities; (ii) undertake Credit Default Swap and (iii) undertake Short Selling.

In accordance with SEBI Circular No. Cir/IMD/DF/11/2010 dated August 18, 2010 the cumulative investments in the Fund including investment in equity and equity related instruments, debt and money market and derivatives, if any, shall not exceed 100% of the net assets under management of the scheme. Security wise hedge positions using derivatives will not be considered in calculating above exposure. The Scheme will not participate in short selling, securitized debt, equity linked debentures, repo transactions of Corporate Debt Securities. The Scheme may invest in unrated debt and debt derivative

instruments. Investment in debt derivatives shall be up to 10% of the net assets of the Scheme.

The Scheme will not participate in securities lending more than 20% of total Net Assets of the Scheme and would limit its exposure with regard to securities lending for a single intermediary to the extent of 5% of the total net assets at the time of lending. Pending deployment of the funds as per the investment objective of the Scheme, the funds of the Scheme may be parked in short term deposits of the scheduled commercial banks, subject to the guidelines and limits specified by SEBI vide its circular dated April 16, 2007, as amended from time to time.

Investment Strategy: Equity Investment Strategy

The Scheme will primarily be a diversified equity fund which will likely (in normal market conditions) invest predominantly in large cap stocks. The Scheme shall hedge its long position by buying a NIFTY 50 PUT Option of contract value up to 110% of its net assets (the option premium paid not exceeding 8% of the net assets), subject to the guidelines issued by SEBI from time to time and in line with the investment objective of the Scheme. The Fund will also invest in the Initial Public Offerings (IPOs) of the companies.

Derivatives strategy:

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index. The fund manager, after appreciation of the NAV, may use derivatives instruments like Stock/ Index Futures and Options and its combination of strategies for the purpose of hedging of portfolio and thus will strive to minimize volatility of returns by apart from investments in equity and equity related instruments and debt instruments.

Investment Strategy during Specified Transaction Period:

The scheme shall use index and stock derivatives (Futures and Options) to hedge partially or completely the equity portfolio.

Debt investment Strategy

The fund will, in general invest a significant part of its corpus in equities and NIFTY 50 PUT Option however the Scheme would also invest whenever suitable opportunities are available in rated debt securities and money market instruments. The scheme may invest into various debt and money market securities maturing on or before the maturity of the scheme. All investments made by the Scheme will be made in accordance with SEBI (Mutual Fund) Regulations, 1996, as amended from time to time. The scheme will follow a structured investment process in order to identify the best securities for investment through internal research framework for consistently examining all securities. The aim of the Scheme will be to allocate the assets of the Scheme between various money market and fixed income securities with the objective of achieving optimal returns with high credit quality portfolio. The actual percentage of investment in various fixed income securities will be decided after considering the prevailing market conditions, the macroeconomic environment (including interest rates and inflation), the performance of the corporate sector and general liquidity and other considerations in the economy and market.

Risk Mitigation :

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. Further, AMC has put in place a Front Office System for managing risk. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

Risk Profile of the Scheme:

Mutual Fund Units involve investment risk including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarised below:

Risks associated with investing in Equities:

- Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.
- Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Investments in equity and equity related Securities involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment
- The liquidity and valuation of the Scheme's investments due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date for divestment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may, however, increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risk associated with Investing in Debt and money market instruments:

The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems. (Please refer to SID for complete Risk Factors)

Dematerialization of units:

The applicants intending to hold Units in dematerialized mode will be required to have a beneficiary account with a Depository Participant of the NSDL/CDSL and will be required to mention in the Application Form details of the DP at the time of purchasing Units.

Listing/Liquidity:

Redemption requests for unitholders holding units in physical mode can be submitted to the Fund only during the Specified Transaction Period.

For investors holding units in demat mode, they shall submit the redemption request during the specified transaction period to the depository participant (DP). Such request accepted and processed by the DP shall be recognized by the Registrar and Transfer Agent (RTA) for changes in the beneficiary position (BENPOS) downloaded on the STP date. Accordingly redemption proceeds shall be paid to the unitholders whose names re appearing in the BENPOS on the STP date. Investors wishing to purchase/redeem between two STP may do so, in demat mode, by transacting through National Stock Exchange of India Ltd. Investors shall note that the brokerage on sale of the units of the scheme on the stock exchanges shall be borne by the investors. For units bought / sold on the exchange, settlement of the trade shall be as per settlement cycle of the Stock Exchange.

The Trustees reserves the right to suspend/deactivate/freeze trading, ISIN of the Scheme at any time prior to the STP

Plans:

- Regular Plan
- Direct Plan

Options:

- Growth Option.
- Dividend Option: Dividend Option will have facility of Dividend pay-out

If the applicant does not indicate the choice of Option in the Application form, the fund accepts the application as being for the Growth Option. Under Dividend Option, if applicant has not indicated the facility, the default facility accepted will be Dividend Payout.
