NAME OF SCHEME : IIFL DYNAMIC BOND FUND

Type of Scheme : An open ended dynamic debt scheme investing across duration

Investment Objective

The investment objective of the scheme is to generate income and long term gains by investing in a range of debt and money market instruments of various maturities. The scheme will seek to flexibly manage its investment across the maturity spectrum with a view to optimize the risk return proposition for the investors.

Asset Allocation

The investment policies of the Scheme shall be as per SEBI (Mutual Funds) Regulations, 1996, and within the following guidelines. Under normal market circumstances, the investment range would be as follows

Type of Instruments	Indicative Allocation (% of Net Assets)		Risk Profile
	Minimum	Maximum	
Debt Market instruments*	0%	100%	Low to Medium
Money Market Instruments	0%	100%	Low to Medium
Units issued by REITs & InvITs	0%	10%	Medium to High

The cumulative gross exposure in debt, money market, units of REIT & InvIT and derivatives shall not exceed 100% of the net assets under management of the scheme.

*Investments in securitized debt including Pass Through Certificates (PTCs) not to exceed 25% of the net assets of the Scheme as at the time of purchase. Investment in debt derivatives shall be up to 50% of the net assets of the Scheme Security Lending will only be with approved intermediaries, will not be more than 20% of the net assets of the Scheme and will not be more than 5% of the net assets of the Scheme to any single counter party. Securities lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the Borrower on expiry of the stipulated period.

The Scheme will not invest in Foreign Securities and will not participate in repo transactions of Corporate Debt Securities.

The total exposure of the Scheme in a particular sector, based on AMFI classification (excluding investments in Bank CDs, CBLO, Government Securities, Treasury Bills and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 25% of the net assets of the Scheme. An additional exposure to financial services sector (over and above the existing 25% limit) not exceeding 15% of the net assets of the scheme may be made by way of investments in AA or higher rated securities of Housing Finance Companies (HFC's) registered with National Housing Bank (NHB). However, the total investment in HFC's shall not exceed 25% of the net assets of the scheme.

The Scheme retains the flexibility to invest across all classes of debt and money market instruments with no cap or floor on maturity, duration or instrument type concentrations. The Fund will dynamically manage the portfolio maturity profile based on the current market condition. Since the intention of fund is to dynamically manage the asset allocation the percentage of allocation would change depending on view of interest rate, level of corporate spread, overall market view and availability of different asset at different point of time.

The Fund shall not take any leveraged position. The total investments in the Fund including investment in debt, money market and other securities and gross exposure of derivatives, if any, shall not exceed the net assets under management in the scheme.

Pending deployment of the funds as per the investment objective of the scheme, the funds of the scheme may be parked in short term deposits of the scheduled commercial banks, subject to the guidelines and limits specified by SEBI from time to time. Subject to limits prescribed by SEBI, the maturity profile of the scheme can undergo a change in case the market conditions warrant and at the discretion of the fund manager.

IIFL Dynamic Bond Fund is different from the existing IIFL Liquid Fund launched by IIFL Mutual Fund, as stated:

Sr. No.	Name of the Scheme	Indicative Asset Allocation of the Scheme		Investment Objective	AUM as on May 31, 2018	No. of Folios as on May 31, 2018

Investment Strategy

The investment objective of the scheme is to generate income and long term gains by investing in a range of debt and money market instruments of various maturities. The scheme will seek to flexibly manage its investment across the maturity spectrum with a view to optimize the risk return proposition for the investors. The scheme will design portfolio which will dynamically track interest rate movements in the short term by reducing duration in a rising rate environment while increasing duration in a falling interest rate environment. In order to maximize returns the fund managers may look at curve spread both on gilt as well as the corporate bond markets to gain maximum value out of any security(s). The Scheme has the discretion to take aggressive interest rate / duration risk calls, which could mean investing the entire net assets in long dated Government securities and debt instruments (carrying relatively higher interest rate risk), or on defensive considerations, entirely in money market instruments. Accordingly, the interest rate risk of the Scheme may change substantially depending upon the Fund's call. The Scheme does not propose to underwrite issuances of securities of other issuers. The Scheme would invest in debt securities of companies based on various criteria like sound professional management, Sound track record, industry scenario, growth prospects, liquidity of the securities, etc. The Scheme will emphasise on well managed, good quality companies with above average growth prospects whose securities can be purchased at a good yield and whose debt securities are rated above the Investment grade by a recognised authority like The Credit Rating and Information Services of India Limited (CRISIL), ICRA Limited, Credit Analysis and Research Limited (CARE) etc. In case of investments in debt instruments that are not rated, specific approval of the Board will be taken except in case of Government Securities being sovereign bonds. Please refer SID for further details.

Risk Profile of The Scheme :

Mutual Fund Units involve investment risk including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down. The value of investment in the scheme may be affected, by change in the market, interest rates, change in credit rating, trading volumes, and settlement period and transfer procedures. The NAV is also exposed to Price/Interest Rate Risk and credit risk and may be affected inter-alia by the government policy, volatility and liquidity in the money market.
- Past performance of the Sponsors/AMC/Mutual Fund does not guarantee the future performance of the Scheme.

Risk associated with Investing in Debt and money market instruments:

Interest Rate Risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.

Credit Risk: This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest.

Liquidity Risk: The liquidity of a bond may change depending on market conditions leading to changes in the liquidity premium linked to the price of the bond. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio.

Risks associated with investments in Derivatives: Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. Please refer SID for further details.

Risk Mitigation

The investment team of the AMC takes an active view on the key drivers affecting interest rate scenario. Investment views / decisions will be based on an analysis of macroeconomic and other relevant factors to estimate the direction of interest rates and level of liquidity, in an attempt to optimize the risk adjusted returns on the portfolio. Portfolios are rebalanced on a dynamic basis as per the objective of the scheme to optimize returns whilst managing risks at all points in time. The credit quality of the portfolio is maintained and monitored using in-house research capabilities as well as inputs from external sources such as independent credit rating agencies. Whilst all risks such as interest rate risk, liquidity risk, default risk, reinvestment risk, etc. cannot be eliminated, they may be minimized through diversification, research and effective use of hedging techniques. The AMC would incorporate adequate safeguards to minimize abovementioned risks in the portfolio construction and management process. To achieve this, an internal Investment Committee meets regularly to provide overall guidance for the investment management process. The Investment Committee periodically reviews the investment strategies and philosophy and adherence to all scheme parameters.

NAME OF THE SCHEME: IIFL FOCUSED EQUITY FUND

Type of the Scheme: An open-ended equity scheme investing in maximum 30 multi-cap stocks

Investment Objective:

The investment objective of the scheme is to generate long term capital appreciation for investors from a portfolio of equity and equity related securities. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

Asset Allocation Pattern of the Scheme:

The investment policies of the Scheme shall be as per SEBI (Mutual Funds) Regulations, 1996, and within the following guidelines. Under normal market circumstances, the investment range would be as follows:

Instruments	Indicative Allocation (% of Net assets)		Risk Profile
	Minimum	Maximum	
Equity or* Equity Related Instruments	75%	100%	High
Debt and money market instruments	0%	25%	Low to Medium

*Equity related instruments are securities which give the holder of the security right to receive equity shares and includes share warrants, convertible preference shares and compulsorily or optionally convertible debentures.

The Scheme will not participate in short selling, securitized debt, equity linked debentures, repo transactions of Corporate Debt Securities. The Scheme may invest in unrated debt and debt derivative instruments. Investment in debt derivatives shall be up to 10% of the net assets of the Scheme. The Scheme may invest in derivative products from time to time as permitted by SEBI. The exposure to derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Scheme will not participate in securities lending more than 20% of total Net Assets of the Scheme and would limit its exposure with regard to securities lending for a single intermediary to the extent of 5% of the total net assets at the time of lending.

IIFL Focused Equity Fund is the only open ended equity scheme of IIFL Mutual Fund.

Investment Strategy: The Scheme would endeavor to identify the sectors that are likely to do well in the medium term, based on the business cycle of the economy and take focused exposure to securities of Companies in identified sectors. The sectors would be actively monitored and changes will be made to invest in sectors that will benefit from the current stage of the business cycle. The Scheme would take concentrated exposure in not more than 25 - 30 high conviction stocks in such sectors. The Scheme would be market cap agnostic and there wouldn't be any restriction on the sectors in which the fund can invest.

Risk Profile of the Scheme: Mutual Scheme Units involve investment risk including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below. Scheme specific Risk Factors are summarised below:

Risks associated with investing in Equities :

- Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.
- Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may, however, increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.
- The sector weightage in the fund would be different from that in the Index. Because of this the fund returns could be divergent from the Index returns and could also under-perform if the sector calls do not go right as expected by the fund management team.

Risk associated with Investing in Debt and money market instruments: The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.

Risk associated with Investing in Derivatives: Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Risk associated with Securities Lending: Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

Risk Mitigation Measures: Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. Further, AMC has put in place a Front Office System for managing risk. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.
