### Name of the Scheme:

IIFL Focused Equity Fund

### Type of the Scheme:

An open-ended equity scheme investing in maximum 30 multi-cap stocks

### Investment Objective:

The investment objective of the scheme is to generate long term capital appreciation for investors from a portfolio of equity and equity related securities. However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

### Asset Allocation Pattern of the Scheme:

The investment policies of the Scheme shall be as per SEBI (Mutual Funds) Regulations, 1996, and within the following guidelines. Under normal market circumstances, the investment range would be as follows

Instruments	Indicative Allocation (% of Net assets)		Risk Profile
	Minimum	Maximum	
Equity or* Equity Related Instruments	75%	100%	High
Debt and money market instruments	0%	25%	Low to Medium

\* Equity related instruments are securities which give the holder of the security right to receive equity shares and includes share warrants, convertible preference shares and compulsorily or optionally convertible debentures.

The Scheme will not participate in short selling, securitized debt, equity linked debentures, repo transactions of Corporate Debt Securities. The Scheme may invest in unrated debt and debt derivative instruments. Investment in debt derivatives shall be up to 10% of the net assets of the Scheme. The Scheme may invest in derivative products from time to time as permitted by SEBI. The exposure to derivative instruments shall not exceed 50% of the total Net Assets of Scheme. The Scheme will not participate in securities lending more than 20% of total Net Assets of the Scheme and would limit its exposure with regard to securities lending for a single intermediary to the extent of 5% of the total net assets at the time of lending.

IIFL Focused Equity Fund is the only open-ended equity scheme of IIFL Mutual Fund.

### Investment Strategy:

The Scheme would endeavour to identify the sectors that are likely to do well in the medium term, based on the business cycle of the economy and take focused exposure to securities of Companies in identified sectors. The sectors would be actively monitored and changes will be made to invest in sectors that will benefit from the current stage of the business cycle. The Scheme would take concentrated exposure in not more than 25 - 30 high conviction stocks in such sectors. The Scheme would be market cap agnostic and there wouldn't be any restriction on the sectors in which the fund can invest.

### Risk Profile of the Scheme:

Mutual Fund Units involve investment risk including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

### Risks associated with investing in Equities:

- Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.
- Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may, however, increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.
- The sector weightage in the fund would be different from that in the Index. Because of this the fund returns could be divergent from the Index returns and could also under-perform if the sector calls do not go right as expected by the fund management team.

### Risk associated with Investing in Debt and money market instruments:

The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.

### Risk associated with Investing in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

**Risk associated with Securities Lending:**

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

**Risk Mitigation Measures:**

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for risk. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.
