I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Scheme may go up or down depending on the factors and forces affecting the capital market/bullion market.
- Past performance of the Sponsors/AMC/Mutual Fund does not guarantee the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and the returns. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Scheme.
- The Sponsor is not responsible or liable for any loss or shortfall resulting from the operation of the Scheme beyond the initial contribution made by it of an amount of Rs. 1 Lac towards setting up of the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme Specific Risk Factors

Tracking Error Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC's ability to achieve close correlation with the underlying index of the Scheme. The Scheme's returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible.

Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty 50 Index or one or more securities covered by / included in the Nifty 50 and may arise from a variety of factors including but not limited to:

1. Any delay in the purchase or sale of securities due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividend, etc.
2. The index reflects the prices of securities at a point in time, which is the price at close of business day on the stock exchange. The scheme, however, may trade the securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be

identical to the closing price of each scrip on that day on the respective stock exchange. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from the closing price considered in the Index.

3.The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.

5.Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.

6.Being an open ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet on going redemptions.

7.The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.

The tracking error of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

The Scheme will disclose the tracking error based on past one year rolling data, on a daily basis, on the website of AMC and AMFI. In case the Scheme has been in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

Tracking Difference:

The tracking difference i.e. the annualized difference of daily returns between the index and the NAV of the Scheme will be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

Risks associated with investing in Equities

- a. Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.
- b. The NAVs of schemes investing in equity will fluctuate as the daily prices of the individual securities in which they invest fluctuate and the units when redeemed may be worth more or less than their original cost.
- c. The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the units of the Scheme may fluctuate and can go up or down.

- d. Investors may note that Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with anticipated trends.
- e. Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. Such securities, however, increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.
- f. The sector weightage in the scheme would be different from that in the Index. Because of this the scheme returns could be divergent from the Index returns and could also under-perform if the sector calls do not go right as expected by the fund management team.

Risk associated with Investing in Debt and money market instruments

The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.

Interest Rate/Price risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, residual maturity of the security, micro and macroeconomic scenario as well as the yield level at which the security is being traded.

Credit Risk/Default risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &/or principal payment obligations. This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. Corporate bonds carry a higher credit risk than Government Securities. Within corporate bonds as well, there are different levels of safety. Credit risks of most issuers of debt securities are rated by independent and professionally run rating agencies. Ratings of Credit issued by these agencies typically range from "AAA" (read as "Triple A" denoting "Highest Safety") to "D" (denoting "Default"), with about 6 distinct ratings between the two extremes. A bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency. The highest credit rating (i.e. lowest credit risk) commands a lower yield for the borrower. Conversely, a lower rated credit borrower would raise funds at a relatively higher cost. On account of a higher credit risk for lower rated borrowers, lenders prefer higher rated instruments further justifying the lower yields.

Re-investment Risk: Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in

value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Counterparty Risk: This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Inflation risk: Inflation, in most basic terms, erodes the purchasing power of money and also withers the value of existing investments; in other words, it reduces the purchasing power of a bond investor's future interest payments and principal, collectively known as "cash flows." Inflation also leads to higher interest rates, which in turn leads to lower bond prices.

Liquidity risk: The liquidity of a bond may change depending on market conditions leading to changes in the liquidity premium linked to the price of the bond. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio. There could therefore be difficulties in exiting from corporate bonds in times of uncertainties. Liquidity in a scheme therefore may suffer.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Legislative Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Schemes.

Risk of Rating Migration: It may be noted that the price of a rated security would be impacted with the change in rating and hence, there is risk associated with such migration.

Units of the Scheme cannot be assigned/ transferred/pledged/redeemed/switched out until completion of three years from the date of allotment of the respective Units

Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

Risks associated with segregated portfolio:

The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.

The risks associated in regard to the segregated portfolio are as follows:

- The investors holding units of the segregated portfolio may not be able to liquidate their holdings till the time of recovery of money from the issuer.
- The security comprising the segregated portfolio may not realize any value.
- Listing of units of the segregated portfolio on a recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units of the segregated portfolio on the stock exchange.
- The trading price of units on the stock exchange may be significantly lower than the prevailing Net Asset Value (NAV) of the segregated portfolio.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. However, if such requirement is not satisfied during the NFO of the Scheme, the Mutual Fund will endeavor to ensure that within a period of 3 (three) months from the start of the NFO, or by the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case a Scheme does not have a minimum of 20 (twenty) investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the Units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied with within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

If there is a breach of the 25% limit by any investor over the calendar quarter, a rebalancing period of 1 (one) month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 (fifteen) days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 (fifteen) days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV on the 15th day of the notice period without any Exit Load. The Mutual Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

In case the AMC or its Sponsor or its Shareholders or their affiliates/associates or group companies make substantial investment, either directly or indirectly in the Scheme, Redemption of units by these entities may have an adverse impact on the performance of the Scheme. D. INVESTMENT BY THE SCHEME

Investment in Equities and equity related instruments

The scheme shall invest into equities and equities related instruments as per limit specified in the asset allocations subject to permissible limits laid under SEBI (MF) regulations.

Investment in Debt and money market instrument: The Scheme may also invest in debt and money market instruments, in compliance with Regulations to meet liquidity requirements. The scheme may also invest in liquid schemes of IIFL Mutual Fund or other schemes which has objective to invest in debt and money market instruments. Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, TREPs and any other like instruments as specified by the Reserve Bank of India from time to time.

E. INVESTMENT STRATEGIES

The Scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 Index in the same proportion as in the Index with the objective of achieving returns equivalent

to the Total Returns Index of Nifty 50 Index by minimizing the performance difference between the benchmark index and the scheme.

The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks.

The Scheme will invest in the securities constituting the Underlying Index. However, due to changes in Underlying Index the scheme may temporarily hold securities which are not part of the index. For instance, the portfolio may hold securities not included in the Underlying Index as result of certain changes in the Underlying Index such as reconstitution, addition, deletion etc. The fund manager's endeavour would be to rebalance the portfolio in order to replicate the Index; however, there may be a short period where the constituents of the portfolio may differ from that of the Underlying Index.

These investments which fall outside the Underlying Index as mentioned above shall be rebalanced within a period of 7 calendar days.

RISK MITIGATION STRATEGIES:

The Scheme aims to track Nifty 50 Index before expenses. The Index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the Underlying Portfolio with the purpose of minimizing tracking error.

Investments in equity, debt and money market securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants.

For risk mitigation, the following may be noted:

Liquidity Risks:

Stocks in the Underlying Index are selected by applying liquidity as one of the criteria and hence the portfolio of Nifty 50 Index is reasonably liquid. The index is rebalanced based on certain criteria after which certain illiquid stocks are replaced by more liquid stocks. The fund manager makes the changes to the portfolio accordingly. Therefore, liquidity issues in the scheme are not envisaged.

Volatility risks:

There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification.

Interest Rate Risk:

Changes in interest rates affect the prices of bonds as well as equities. If interest rates rise the prices of bonds fall and vice versa. Equity might be negatively affected as well in a rising interest rate environment. A well-diversified portfolio may help to mitigate this risk.

Expenses such as distribution expenses, brokerage or commission payable to distributors will not be charged to the investment made via direct investment and hence the Direct Plan will have a lower expense ratio.

Based on the above, the Scheme offers a choice of two plans:

1. Direct Plan; and
2. Regular Plan

fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

b) All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing circular on applicability of NAV as under:

c) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.

d) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Monitoring by Trustees:

In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:

i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.

ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.

iv. The Trustees shall monitor the compliance of SEBI requirements and disclosure in this respect shall be made in half-yearly trustee

reports filed with SEBI.

In order to avoid mis-use of segregated portfolio, the Trustees have ensured to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Please note that the process followed by the AMC regarding creation of segregated portfolios shall be in accordance with the provisions laid down by SEBI from time to time.

11. Maximum amount: It is the upper most limit per transaction set by the investor for his registered bank account to be debited through the One Time Mandate (OTM). If the maximum amount set in the OTM is less than the Cap amount, a new OTM needs to be registered with the revised maximum amount. Till the time a revised OTM with change in maximum amount is submitted, the existing maximum amount will be considered as the STEP-UP Cap amount. Along with new OTM, a revised STEP-UP form also needs to be submitted with the STEP-UP Cap amount.
12. In case the SIP frequency is perpetual then the investor has to mention the STEP-UP Cap amount.
13. This facility is not available on NSE MFSS/ BSE STAR MF and MFU platforms.
14. All other terms & conditions applicable for regular SIP Facility will also be applicable to STEP-UP Facility.

b. Systematic Transfer Plan (STP)

This facility enables the unitholders to switch an amount from their existing investments in a Scheme/Option of the Fund, which is available for investment at that time at periodic intervals through a one time request. The switch can be made either weekly, fortnightly or monthly. Under this facility the switch by the unit holders should be within the same account/folio number. The unitholder has to fulfill the following criteria in order to avail of the Systematic Transfer Plan –

- a) A Unit Holder has to have a minimum balance of Rs. 10,000/- in a scheme.
- b) the minimum amount as stated in the offer document of the respective transferor scheme, whichever is higher.
- c) A minimum of 6 such transfers have to be submitted for the STP.

The transfer will be effected by way of a switch, i.e. redemption of Units from one Scheme and investment of the proceeds thereof, in the other Scheme at the then prevailing terms of both Scheme. All transactions by way of STP shall, however, be subject to the terms (other than minimum application amount) of the target Scheme. A Unit Holder who opts for an STP has the choice of switching (i) a fixed amount or (ii) an amount equal to the periodic appreciation on his/her/its investment in the Scheme from which the transfer is sought, as detailed below:

Fixed Amount Option

Under this alternative, a Unit Holder may switch a fixed amount of at least Rs. 1,000/- per transaction and the 'STP Date' for the switch will be as under.

- a) where a weekly STP is opted for, the STP Date shall be the 1st, 7th, 14th or 21st, as the case may be, for the period concerned.
- b) where a fortnightly STP is opted for, the STP Date shall be the 1st, 7th, 14th or 21st, as the case may be. For example, if the investor selects 1st then the next date could be 14th or if he selects 7th then the next date could be 21st of the month.
- c) where a monthly STP is opted for, the STP Date shall be the 1st, 7th, 14th or 21st, as the case may be, of the month concerned.

The Units in the Scheme/Option from which the switch – out is sought will be redeemed at the Applicable NAV of the Scheme/Option on the respective dates on which such switches are sought and the new Units in the Scheme/Option to which the switch – in is sought will be created at the Applicable NAV of such Scheme/Option on the respective dates. In case the day on which the transfer is sought is a non-business day for the Scheme, the same will be processed on the immediately following business day.

Appreciation Option

Under this option, the Unitholder can seek switch of an amount equal to the periodic appreciation on the investment. This facility is available only under monthly frequency. Under this option the Unit holder switches only proportionate number of Units, which when multiplied by the applicable NAV is in amount terms equal to the appreciation in the investment over the last month.

The investor has to mention a “Start Date”. The ‘STP Date’ available under this alternative are 1st, 7th, 14th or 21st of the month. The first switch will happen after one month from the start date. In case the investor purchases additional Units, the amount to be switched would be equal to the appreciation generated on such Units, provided the appreciation is atleast Rs. 1000/-. In the absence of any appreciation or appreciation less than Rs. 1000/- as mentioned above, the switch under this option will not be made for that month. The Units in the Scheme/ Option from which the switch – out is sought will be redeemed at the Applicable NAV of the Scheme/Option on the respective dates on which such switches are sought and the new Units in the Scheme/ Option to which the switch – in is sought will be allotted at the Applicable NAV of such Scheme/Option on the respective dates. In case the day on which the transfer is sought is a non-business day for the Scheme, the same will be processed on the immediately following business day.

c. Systematic Withdrawal Plan (SWP)

This facility enables the Unitholders to withdraw sums from their Unit accounts in the Scheme at periodic intervals through a one-time request. Withdrawals will be subject to completion of lock in period. The withdrawals can be made on Monthly basis on 1st, 7th, 14th or 21st of every month. This facility is available in two options to the Unitholders:

Fixed Option:

Under this option, the Unitholder can seek redemption of a fixed amount of not less than Rs. 1000/- from his Unit account. In this option the withdrawals will commence from the Start Date (being one of the dates indicated above) mentioned by the Unitholder in the Application Form for the facility. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. In case the day on which the withdrawal is sought is a non-business day for the Scheme, the same will be processed on the immediately following business day.

Appreciation Option:

Under this option, the Unitholder can seek redemption of an amount equal to a periodic appreciation on the investment. The Unitholder redeems only such number of Units, which when multiplied by the Applicable NAV is, in amount terms equal to the appreciation in his investment over the last month provided the appreciation is atleast 1000/-. In the absence of any appreciation or appreciation less than 1000/- as mentioned above, the withdrawal under this option will not be made for that month. The investor would need to indicate in his systematic withdrawal request, the commencement / start date from which the appreciation in investment value should be computed.

The withdrawal will commence after one month from the commencement / start date mentioned by the Unitholder in the application Form and can, at the investor’s discretion be on 1st, 7th, 14th or 21st of the month. The Units will be redeemed at the Applicable NAV of the respective dates on which such withdrawals are sought. In case the day on which the withdrawal is sought is a non business day

for the Scheme, the same will be processed on the immediately following business day. In case the investor purchases additional Units, the withdrawal amount would include the appreciation generated on such Units as well. In the absence of any appreciation or appreciation less than Rs. 1000/-, the redemption under this option will not be made.

Note: Investors who avail of SIP, SWP or STP facility can at any time opt out of the facilities or can purchase, redeem or switch outside these facilities at their convenience.
